

Abstract – AOC 2023 workshop

Introducing Multi-Track VHF Receivers – A Practical Guide to Optimising Radio-Telemetry for Drone-Tracking, and More

Learn how to increase the efficiency of wildlife tracking while collecting accurate and reliable data for spatial and temporal analysis. The Multi-Track receiver allows you to track 500 radio-tagged animals simultaneously, and can be used from a drone, aircraft, vehicle, and on foot. Here we discuss this new technology, and show you how to get the best from it.
